

4. Consider the schema for College Database:

STUDENT (USN, SName, Address, Phone, Gender) **SEMSEC** (SSID, Sem, Sec)

CLASS (USN, SSID)

SUBJECT (Subcode, Title, Sem, Credits)

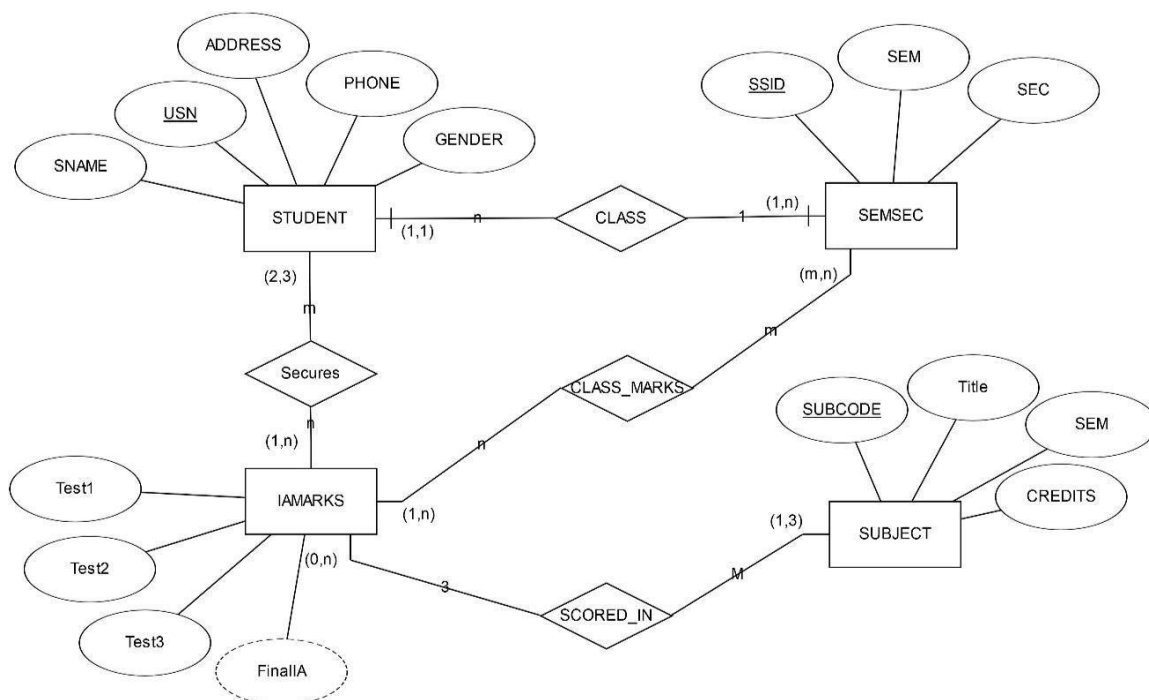

IAMARKS (USN, Subcode, SSID, Test1, Test2, Test3, FinalIA)

Write SQL queries to

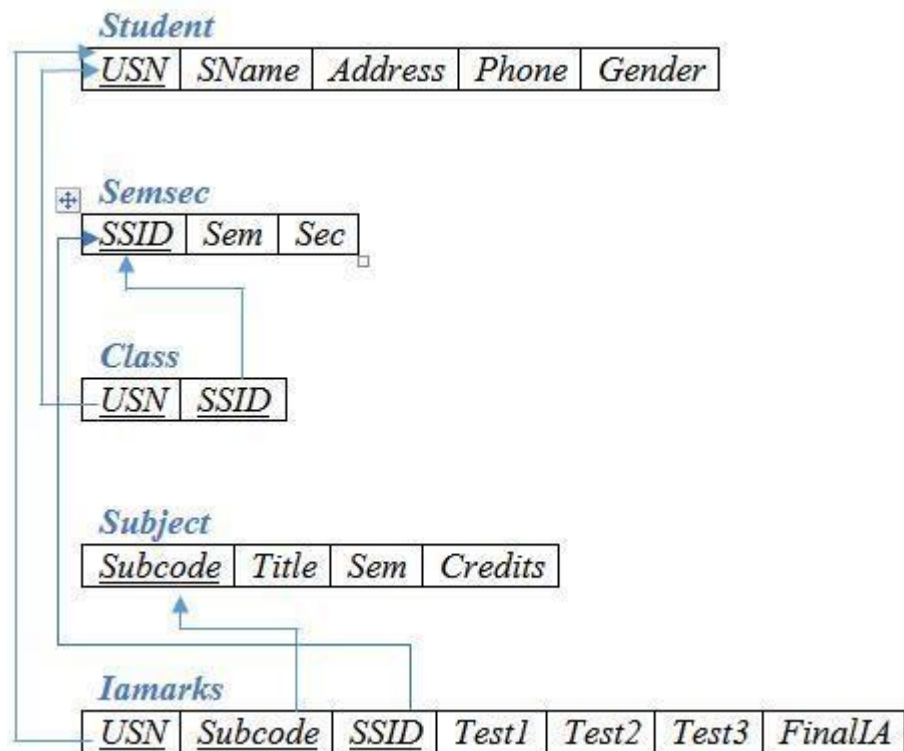

- List all the student details studying in fourth semester 'C' section.
- Compute the total number of male and female students in each semester and in each section.
- Create a view of Test1 marks of student USN '1NC15CS101' in all subjects.
- Calculate the FinalIA (average of best two test marks) and update the corresponding table for all students.
- Categorize students based on the following criterion: If FinalIA = 17 to 20 then CAT = 'Outstanding'
- If FinalIA = 12 to 16 then CAT = 'Average' If FinalIA < 12 then CAT = 'Weak'
- Give these details only for 8th semester A, B, and C section students.
